SPIRITUAL CENTRE FOR INS DAG
BASIC LEARNING CENTRE FOR YUVARATNA
THOUGHT BEHIND PROGRAM EVALUATION

The concept would not be a conventional multi-functional building with a single functional area. It would be a blend of various functional areas, such as learning, recreational, and social spaces, all within the same building. The building would be designed to be energy-efficient and sustainable, with a focus on creating a healthy and supportive learning environment for young students.

CONCEPT

RESIDENTIAL PROGRAMS

The concept is to create a unique and innovative learning environment that is tailored to the needs of young students. The building would be designed to be energy-efficient and sustainable, with a focus on creating a healthy and supportive learning environment for young students.

SUSTAINABILITY FEATURES

ECOLOGICAL SUSTAINABILITY

The design incorporates the use of locally available materials and resources to reduce the environmental impact of the building. The building would be designed to be energy-efficient and sustainable, with a focus on creating a healthy and supportive learning environment for young students.

MATERIALS

BAMBOO SHEET, STAIRS AND ROOFING MATERIALS

DESIGN STRATEGIES

The design incorporates the use of locally available materials and resources to reduce the environmental impact of the building. The building would be designed to be energy-efficient and sustainable, with a focus on creating a healthy and supportive learning environment for young students.

DESIGN OF BASIC LEARNING ENVIRONMENT FOR PRIMARY STUDENTS AT PHULGAON
A mountain hut is a trail to the peak of the mountain, allowing the mountaineer to rest along the way. The concept of this mountain hut is derived from a snowflake. A snowflake represents the most beautiful part of a snowy climatic condition. In the face of strong forces of nature, finding a snowflake brings about a feeling of joy and comfort. Mountaineers climb mountains to see beautiful vistas, but if they want to feel truly happy, the mountain hut has to be a snowflake, a symbol of comfort to the eye and to the mind.

CONCEPT

Evolution of Form

The roof is constructed of a timber frame, and is then mounted with folded bamboo plates. This form drives off the snow that might fall on the hut and also gives a very pleasant look to the viewer.
