

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1:

Technical Knowledge:

Understand the basic concepts for automation and intelligent system

PEO2:

Success in Career:

Apply the knowledge to excel in professional choices like, software engineer, higher education, or entrepreneurship

PEO3:

Soft Skills for Lifelong Learning

Develop a sustainable solution for societal challenges while following professional ethics and teamwork.

PROGRAM SPECIFIC OUTCOMES (PSOs):

PSO1: Software/Hardware Development

Apply the fundamental knowledge of computer science and engineering in developing effective software/hardware for real world complex engineering problems by adapting advanced technologies.

PSO2: Innovative Solution

Analyze and configure various IoT based innovative and smart applications using recent hardware and software tools.

PSO3: Efficient professional practice

Design industrial IoT based solutions for improving operational efficiency at home and industry automation systems.
